*Bachelor's degree in Computer Science*

**Minsk, Belarus**

*September 2021 — Expected 2025*

- Programming (C++, Java)
- Database management systems
- Algorithms
- Calculus, Linear Algebra, Functional analysis
- Probability theory and mathematical statistics
- Optimization methods

## PROJECTS AND EXPERIENCE

---

### Baraka

**July 2024 - Present**

[Download on Play Market](#)

An application for finding jobs, housing, and services in all CIS countries.

Job duties:

- fixing bugs
- implementing new features
- building REST requests
- implementing new features

### Tinkoff academy

**September 2023 — December 2023**

[Backend-development Java](#)

- Console game "Hangman"
- Maze generator  
Implemented DFS algorithm for generating and solving mazes.
- Log analyzer:  
Count the total number of requests, identify the most frequently requested resources, identify the most common response codes, calculate average server response size  
Implemented: Parsing command line arguments `-path`, `-format(optional)`, `-to(optional)`, `-date(optional)`, collecting logs locally by template and URL, result output format: markdown or adoc

### Belarusian State University

**June 2022**

*Educational practice*

- Java Basics

## SKILLS

---

**Languages:** Kotlin, Java

**Skills:** Android Fundamentals, XML  
REST API, OkHttp, Room  
MVP, MVVM  
RecyclerView  
Git
